Dear Sir/Madam,

Pursuant to the Regulation 30 of SEBI Listing Regulations, please find attached copies of extracts of the newspaper advertisement for the extract of the Unaudited Financial Results (Standalone and Consolidated) of the Company for the quarter ended on 30th June, 2021, published in all editions of Financial Express, Indian Express and Jansatta on 10th August, 2021.

We request you to kindly take the same on record.

Thanking You,

Yours Faithfully,

For Kamdhenu Limited

Khem Chand Company Secretary & Compliance Officer

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate

Change (IPCC) on Monday. The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5degree Celsius warming was likely to be reached before 2040.

The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and

other species to survive. On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate mat-

ter due to human activity have crease in aerosols and particuinfluenced rainfall events in the late matter due to human activ-Indian subcontinent. The domiity, the report said, while predictnant cause of the observed deing that in the long-term, South crease of South and Southeast and Southeast Asian monsoon Asian monsoon precipitation and East Asian summer monsince mid-20th century is the insoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed."For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past

crease of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds. The report projects that in

few decades because of the in-

the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

Message for India: Net-zero emissions target a must Nargol Greenfield port project in Gujrarat opposed by locals

AMITABH SINHA Pune, August 9

WITH A WARNING that a 1.5degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

In the case of the Sixth Assessment Report, the fact that the 1.5 degree Celsius warming

has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has said that 1.5 degree warming was inevitable even in the best-case scenario.

For India, it is likely to mum required to keep the temtranslate into increased perature rise to 1.5 degree Celpressure to agree to a sius.

> Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060.

But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as important as the destination.

don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November. Sharma emphasised on the

need to keep the hopes alive for a 1.5 degree world, as did all the speakers from IPCC at the release of the report.

FE BUREAU Ahmedabad, August 9

ATATIME when the Gujarat government is in the advanced stage of developing a Greenfield port at Nargol village, voices have been raised against the ambitious project by the localities. Recently a pre-bid meeting

Nargol beach as tourist destination and drop the port project. Convener of the UTKBS, Shailesh Hodivala said that if the port would come up at Nargol, thousands of fishermen would be impacted adversely. According to Hodivala, the Nargol Gram Panchayat had passed a resolu-

adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their livelihood."

UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be projected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum.

seen around the world and if we

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the tempera-

tures drop back again to 1.4 degree C by the end of the century. Several countries, more than 100, have already announced their intentions to achieve netzero emissions by the middle of

other countries, and that any further burden would jeopardise the century. These include major emitters its continuing efforts to pull its like the United States, China and millions out of poverty. the European Union.

The IPCC said that a global India, the third largest emitnet-zero by 2050 was the mini-

net-zero target, a

deadline by which it

should be able to bring

down its emissions to a

level that equals the

absorptions made by its

ter in the world, has been hold-

ing out. It has argued that it was

already doing much more than it

was required to do, performing

better, in relative terms, than

Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target.

Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond.

The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways.

"The science is clear, the impacts of the climate crisis can be

emissions," he said.

"Our message to every country, government, business and part of society is simple. The next decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane Gujarat government and sug-

state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, JM Baxi Group and the Dubai based logistic firm DP World

participated. Reacting on the meeting, Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform form to oppose the proposed port by the local residents of the area has submitted a memorandum to

gested to develop picturesque

tion against the Greenfield port for the development of the port project in gram sabha (village in Umargam taluka of Valsad convention).

district was conducted by the In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get dis-

turbed due to pollution which

would impact fishing activities

Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

Kamdhenu Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.

India likely to see more heat waves, droughts, cyclones: IPCC report

A grim reminder: Paris climate goal set to be breached in two decades

ESHA ROY New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity – this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6) – its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag — that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5degree Celsius warming was likely to be reached before 2040. The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive. On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

The report says the presence of aerosols and particulate matter due to human activity have

influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the increase in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian

monsoon and East Asian summermonsoon precipitation will increase. The report also says there is

now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a

fact, warming is a fact and that the warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit

temperatures to 1.5 degrees Celsius from pre-industrial levels, we will continue to see extreme weather events," says Dr

cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says.

The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying

Message for India: Net-zero emissions target a must

AMITABH SINHA Pune, August 9

WITH A WARNING that a 1.5degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for

immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target — a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive. They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations. In the case of the Sixth

Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has

said that 1.5 degree warming was inevitable even in the best case scenario. The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, over shoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

China's economic risks build as Delta cases spread, prices gain

BLOOMBERG August 9

CHINA'S ECONOMIC RISKS are building in the second half of the year, with growth set to slow while inflation pressures are picking up, clouding the outlook for central bank support.

Areport Monday showed factory-gate inflation surging again to 9% in July as commodity prices climbed, while core consumer prices — which strip out volatile food and fuel costs -- rose the most in 18 months.

At the same time, the spread of the delta variant is threatening ing likely to come.

China's outlook, with Goldman Sachs Group and JPMorgan Chase & Codowngrading growth forecasts for the third quarter and full year, and predicting more central bank easing.

strategist at Australia & New The latest developments are Zealand Banking Group Ltd. another complication for policy "Even though prices are still makers, who have already high, they won't have much mopledged fiscal and monetary mentum to rise further, so it support for the economy in the won't create a huge constraint

second half of the year. While on monetary policy." some economists see inflation risks limiting the room for central bank action, many see the uncertain growth environment as a bigger worry, with more eas-

most since January, to 2.85%. Inflation, though, is unlikely

"As the outbreak unfolds, to be a key consideration for China's domestic demand will monetary policy in the near weaken, and the overall inflaterm.The growth outlook -- under pressure from new outtion pressure will decline," said Xing Zhaopeng, senior China breaks of the Covid-19 variant -- will be a bigger concern that could prompt the People's Bank of China to do more to support the economy, following a cut in the required reserve ratio in mid-July.

The jump in factory-gate in-Chinese government bonds flation was largely due to higher extended losses after the data, commodity prices, in particular oil and coal. Beijing has been trywith the yield on the 10-year security rising 4 basis points, the ing to quell the surge in commodity prices by releasing inventory from the nation's strategic

reserves, cracking down on hoarding and speculation, and ordering state-owned enterprises to limit their exposure to overseas commodities markets.

Core CPI rose 1.3% in July from a year ago, suggesting domestic demand is getting stronger. Food prices declined 3.7% from a year ago, mainly due to a 43.5% plunge in pork prices, a key item in the CPI basket.

"PPI will probably be around 6% by the year-end. This will to some extent limit the room for monetary easing," said Zhou Hao, senior emerging markets econo-

mist at Commerzbank AG in Singapore. "The possibility of a rate cut is extremely small."

Latest trade data also showed an easing in global demand, another headwind for China's growth.Export growth slowed to 19.3% in July, missing forecasts, the customs administration said Saturday. Extreme weather conditions and local Covid outbreaks have disrupted production and shipping in parts of China, while record-high freight costs have squeezed exporters' profits.

"This puts the policy makers in a dilemma: inflation is rising and growth is slowing,"

Industries

(₹in Lakbs)

kⁱrloskar

said Zhang Zhiwei, chief economist at Pinpoint Asset Management."The pandemic worsened and caused more disruption in the global supply chain."

China's zero-tolerance ap-

proach to controlling the spread of the virus means more scrutiny on cross-border movement of cargo and travelers, which will probably put further stress on the supply chain, he said.

India likely to see more heat waves, droughts, cyclones: IPCC report

A grim reminder: Paris climate goal set to be breached in two decades

ESHA ROY New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity – this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6) – its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag — that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5degree Celsius warming was likely to be reached before 2040. The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive. On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

The report says the presence of aerosols and particulate matter due to human activity have

influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the increase in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian sum-

mermonsoon precipitation will increase. The report also says there is

now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a

fact, warming is a fact and that the warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Cel-

cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says.

The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying

Message for India: Net-zero emissions target a must

AMITABH SINHA Pune, August 9

WITH A WARNING that a 1.5degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for

immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target — a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive. They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

In the case of the Sixth

Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries. Not that the deadline was

not known earlier. But this is the first time that the IPCC has

said that 1.5 degree warming was inevitable even in the best case scenario. The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, over shoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5degree Celsius warming was likely to be reached before 2040.

The stated objective of the

2015 Paris Agreement, the international architecture to fight cli-

mate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it dif-

ficult for human beings and other species to survive. On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate mat-

ter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the in-

crease in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed."For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

mum required to keep the temperature rise to 1.5 degree Celsius.

Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060.

But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as im-

seen around the world and if we don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November. Sharma emphasised on the

need to keep the hopes alive for a 1.5 degree world, as did all the

in Gujrarat opposed by locals

FE BUREAU Ahmedabad, August 9

ATATIME when the Gujarat government is in the advanced stage of developing a Greenfield port at Nargol village, voices have been raised against the ambi-

Nargol beach as tourist destination and drop the port project.

Convener of the UTKBS, Shailesh Hodivala said that if the port would come up at Nargol, thousands of fishermen would be impacted adversely. According to Hodivala, the Nargol Gram

adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their liveli hood."

UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be projected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum. Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

sions.

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

in the 2030s, overshoot to 1.6 degree C, before the tempera-

tures drop back again to 1.4 degree C by the end of the century. Several countries, more than 100, have already announced their intentions to achieve netzero emissions by the middle of

the century. These include major emitters like the United States, China and the European Union.

ter in the world, has been holding out. It has argued that it was already doing much more than it was required to do, performing better, in relative terms, than other countries, and that any further burden would jeopardise

its continuing efforts to pull its millions out of poverty. The IPCC said that a global

India, the third largest emitnet-zero by 2050 was the mini-

portant as the destination.

Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target.

Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond.

The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways.

"The science is clear, the impacts of the climate crisis can be

speakers from IPCC at the release of the report.

"Our message to every country, government, business and part of society is simple. The next decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane

emissions," he said.

tious project by the localities.

Recently a pre-bid meeting for the development of the port in Umargam taluka of Valsad district was conducted by the state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, IM Baxi Group and the Dubai based logistic firm DP World participated.

Reacting on the meeting, Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform form to oppose the proposed port by the local residents of the area has submitted a memorandum to Gujarat government and suggested to develop picturesque

Panchayat had passed a resolution against the Greenfield port project in gram sabha (village convention).

In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get disturbed due to pollution which would impact fishing activities

Kamdhenu Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY

New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5degree Celsius warming was likely to be reached before 2040.

The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 de-

gree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive. On India, the report says heat

waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate mat-

ter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the in-

crease in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

FE BUREAU

Ahmedabad, August 9

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed."For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past

few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds. The report projects that in

the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

Message for India: Net-zero emissions target a must Nargol Greenfield port project in Gujrarat opposed by locals

AMITABH SINHA Pune, August 9

WITH A WARNING that a 1.5degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for immediate cuts on global greenhouse gas emis-

sessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission

cuts from all countries. Not that the deadline was not known earlier. But this is the first time that the IPCC has said that

For India, it is likely to In the case of the Sixth Astranslate into increased

pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its

carbon sinks, such as

mum required to keep the temperature rise to 1.5 degree Celsius.

Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060.

But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as im-

seen around the world and if we don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November.

Sharma emphasised on the need to keep the hopes alive for a 1.5 degree world, as did all the speakers from IPCC at the retious project by the localities. lease of the report.

Nargol beach as tourist destination and drop the port project.

Convener of the UTKBS, Shailesh Hodivala said that if the **ATATIME** when the Gujarat government is in the advanced stage port would come up at Nargol, of developing a Greenfield port thousands of fishermen would at Nargol village, voices have be impacted adversely. Accordbeen raised against the ambiing to Hodivala, the Nargol Gram adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their livelihood."

UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be projected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum.

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

1.5 degree warming was inevitable even in the best-case scenario.

The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

Several countries, more than 100, have already announced their intentions to achieve netzero emissions by the middle of the century.

These include major emitters like the United States, China and the European Union. India, the third largest emit-

forests. IPCC assessment reports, the sixth edition of which was released on Monday, are not policy

prescriptive.

ter in the world, has been holding out. It has argued that it was already doing much more than it was required to do, performing better, in relative terms, than other countries, and that any further burden would jeopardise its continuing efforts to pull its

millions out of poverty.

The IPCC said that a global net-zero by 2050 was the miniportant as the destination.

Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target.

Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond.

The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways.

"The science is clear, the impacts of the climate crisis can be emissions," he said.

"Our message to every country, government, business and part of society is simple. The next district was conducted by the decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane

state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, JM Baxi Group and the Dubai based logistic firm DP World participated. Reacting on the meeting,

Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform form to oppose the proposed port by the local residents of the area has submitted a memorandum to Gujarat government and suggested to develop picturesque

Panchayat had passed a resolution against the Greenfield port Recently a pre-bid meeting for the development of the port project in gram sabha (village in Umargam taluka of Valsad convention).

In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get dis-

turbed due to pollution which

would impact fishing activities

Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

Kamdhenu Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.

देश पधारो पदक वीरः तोक्यो ओलंपिक में इतिहास रचकर देश लौटे सूरमा

रूस की चौथी वरीयता प्राप्त दारिया कास्ताकिना को हराकर सिलिकॉन वैली क्लासिक टेनिस टूर्नामेंट का खिताब जीतने के बाद अमेरिका की डेनियल कोलिंस।

कोलिंस को सिलिकॉन वैली क्लासिक का खिताब

सैन जोस, 9 अगस्त (एपी)।

अमेरिका की डेनियल कोलिंस ने रविवार को रूस की चौथी वरीयता प्राप्त दारिया कास्ताकिना को हराकर सिलिकॉन वैली क्लासिक टेनिस टूर्नामेंट का खिताब जीता। सातवीं वरीयता प्राप्त कोलिंस ने अपनी अच्छी फॉर्म जारी रखते हुए कास्ताकिना को 6-3, 6-7 (10), 6-1 से हराया। उन्होंने 25 जुलाई को ही पालेरमो में भी खिताब जीता था। कोलिंस ने कहा, 'मैंने बहुत अच्छी शुरुआत की थी और मैंने अच्छी टेनिस खेली। मुझे नहीं लगता कि दारिया पहले सेट में अपना सर्वश्रेष्ठ टेनिस खेल रही थीं। दूसरे सेट में उसने वास्तव में अपने खेल में सुधार किया और 5-3 से आगे हो गई थीँ जिसके बाद मैं इसे टाईब्रेकर तक ले गई।' युगल में दारिया जुराक और आंद्रिया क्लेपाक ने गैब्रियला डाब्रोवस्की और लूइसा स्टेफनी से खिताब जीता।

संसद में भारतीय ओलंपिक खिलाडियों को दी गई बधाई

जनसत्ता ब्यूरो नई दिल्ली, 9 अगस्त।

तोक्यो ओलंपिक में भाला फेंक स्पर्धा में स्वर्ण पदक जीतकर इतिहास रच देने वाले नीरज चोपडा सहित विभिन्न भारतीय ओलंपिक खिलाड़ियों को संसद के दोनों सदनों में सोमवार को बधाई दी गई। लोकसभा और राज्यसभा में जैसे ही आसन की ओर से ओलंपिक शब्द का उल्लेख किया गया, सदस्यों ने मेजें थपथपाना शुरू कर दी जिससे इस उपलब्धि को लेकर उनका उत्साह और प्रसन्नता साफ झलक रही थी।

लोकसभा में अध्यक्ष ओम बिरला ने तोक्यो ओलंपिक में भाला फेंक श्रेणी में नीरज चोपड़ा

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक पदार्पण पर पदक जीतना लवलीना बोरगोहेन के लिए सोने पे सुहागा जैसा रहा लेकिन इस भारतीय मुक्केबाज ने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। वह पेरिस में 2024 में होने वाले खेलों के लिए अपने खेल के हर पहलू में नए सिरे से शुरुआत करेंगी। लवलीना ने तोक्यो में महिलाओं के 69 किग्रा भार वर्ग में कांस्य पदक जीता।

यह 23 वर्षीय खिलाडी ओलंपिक में पदक जीतने वाली तीसरी भारतीय मुक्केबाज है। उनसे पहले विजेंदर सिंह (2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी।

और ऐसा लगातार आठ साल तक चला। उन्होंने अब छुट्टियां मनाने की योजना बनाई है और इसके बाद पैरिस ओलंपिक की तैयारियों में जुटना चाहती हैं जिनका आयोजन तीन साल बाद होना है। उन्होंने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू/ पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने घूंसों को

अतिरिक्त मजबूती प्रदान करना भी शामिल होगा क्योंकि तुर्की की ओलंपिक चैंपियन बुसेनाज सुरमेनेली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ

तौर पर इसे होना चाहिए था। मैंने अपनी ताकत और अनुकूलन पर केवल पिछले चार महीनों में ही काम किया। मुझे इसका लाभ मिला लेकिन ओलंपिक जैसी प्रतियोगिता के लिए चार महीने पर्याप्त नहीं होते हैं। उससे कुछ नहीं होता आपको चार साल के चक्र में इस तरह का काम करना होता है ।

उन्होंने पिछले कुछ सालों से अपनी भावनाएं दबा रखी थीं जो पदक पक्का होने के बाद खुलकर सामने आई। लवलीना ने कहा कि कई सालों तक मेरी भावनाएं अंदर ही दबी रहीं। लेकिन इस

आ

लवलीना के लिए

सबसे यादगार पल क्वार्टर फाइनल में पूर्व विश्व चैंपियन नीन चिन चेन को हराना रहा।

उन्होंने कहा कि सबसे यादगार पल मैं आखिर में उस मुक्केबाज को हराने में सफल रही जिसने यहां आने से पहले मुझे चार बार हराया था। उसे ओलंपिक में हरानाँ मेरे करिअर का विशेष क्षण था। दूसरा यादगार पल कतर और इटली के बीच ऊँची कूद का स्वर्ण पदक साझा किया जाना रहा। इससे पता चलता है कि मानवता जिंदा है और खेल एकमात्र जरिया है जो दो देशों, दो इंसानों को इस तरह से जोड़ सकता है। इटली के गियानमार्को ताम्बेरी और कतर के मुताज बारशिम ने पुरुषों की ऊंची कूद में समान 2.37 मीटर की ऊंचाई नापी थी। वह बारशिम थे ओलंपिक में जब हर जिन्होंने अपने अच्छे मित्र ताम्बेरी के साथ बार रिंग पर उतरने खिताब साझा करने की पेशकश की थी। ऊंची कूद में दोनों खिलाड़ियों के सहमत पर मुझे देशवासियों के समर्थन का होने पर पदक साझा करने का प्रावधान है लेकिन पिछले 100 वर्षों से अधिक समय में अहसास हुआ तो ऐसा पहली बार हुआ। लवलीना ने कहा कि कोई तब मेरी भावनाएं कितना भी मतभेद पैदा करने की कोशिश करे. बाहर निकलकर खेल सभी को साथ ला सकते हैं। मैंने उसको गईं । देखकर यह सीख ली। में ओलंपिक

के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है। उन्होंने कुश्ती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदन की ओर से ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाड़ियों को बधाई दी।

राज्यसभा में सभापति एम वेंकैया नायडू ने कहा कि तोक्यो ओलंपिक में हमारी 120 वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौगंध खाई थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से घर से दर रहना और मश्किल परिस्थितियों में परिवार वालों का साथ नहीं दे पाना था। यह सबसे बड़ा बलिदान था। मैंने व्यक्तिगत तौर पर अपनी कुछ इच्छाओं को मारा जैसे वह भोजन नहीं कर पाना जैसा कि मेरी उम्र के लोग पसंद करते हैं। मैंने खेल पर ध्यान देने के लिए अवकाश नहीं लिया

रहा था।

संसद में भारतीय ओलंपिक खिलाड़ियों को दी गई बधाई

जनसत्ता ब्यूरो नई दिल्ली, 9 अगस्त।

तोक्यो ओलंपिक में भाला फेंक स्पर्धा में स्वर्ण पदक जीतकर इतिहास रच देने वाले नीरज चोपडा सहित विभिन्न भारतीय ओलंपिक खिलाडियों को संसद के दोनों सदनों में सोमवार को बधाई दी गई। लोकसभा और राज्यसभा में जैसे ही आसन की ओर से ओलंपिक शब्द का उल्लेख किया गया, सदस्यों ने मेजें थपथपाना शुरू कर दी जिससे इस उपलब्धि को लेकर उनका उत्साह और

प्रसन्नता साफ झलक रही थी। लोकसभा में अध्यक्ष ओम बिरला ने तोक्यो ओलंपिक में भाला फेंक श्रेणी में नीरज चोपडा के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है । उन्होंने कुश्ती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदन की ओर से ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाड़ियों को बधाई दी।

राज्यसभा में सभापति एम वेंकैया नायडू ने कहा कि तोक्यो ओलंपिक में हमारी १२० वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

पूर्व अतरराष्ट्रीय हॉकी खिलाडी गोपाल भेंगरा का निधन रांची, 9 अगस्त (भाषा)।

पूर्व अंतरराष्ट्रीय हॉकी खिलाडी गोपाल भेंगरा का लंबी बीमारी के बाद सोमवार को यहां निधन हो गया। भेंगरा ने 1978 में अर्जेंटीना में हुए विश्व कप में भारत का प्रतिनिधित्व किया था। झारखंड के मुख्यमंत्री हेमंत सोरेन ने भेंगरा के निधन पर शोक जताते हुए कहा, 'पूर्व हॉकी खिलाडी गोपाल भेंगरा के निधन की दुखद खबर मिली। भेंगरा ने हमेशा देश का सिर ऊंचा रखा, फिर चाहे यह देश की सीमा हो या हॉकी का मैदान।'

पदक वीर : तोक्यो ओलंपिक में इतिहास रचकर देश लौटे सूरमा

चोपड़ा ने कहा कि मुझे पता था कि मैंने कुछ विशेष कर दिया है, असल में मैंने सोचा कि मैंने अपना निजी सर्वश्रेष्ठ प्रदर्शन किया है। मेरी थ्रो काफी अच्छी गई थी। चोपड़ा का निजी सर्वश्रेष्ठ प्रदर्शन 88.07 मीटर है जो उन्होंने इसी साल हासिल किया था। उन्होंने कहा कि अगले दिन मेरे शरीर ने महसुस किया कि वह प्रदर्शन इतना विशेष था, शरीर दुख रहा था लेकिन यह दर्द सहन करने में कोई समस्या नहीं थी। यह पदक पूरे देश के लिए है। सेना के 23 साल के इस खिलाड़ी ने कहा कि देश के खिलाड़ियों के लिए उनका एकमात्र संदेश यह है कि कभी भी डरो नहीं। उन्होंने कहा कि मैं सिर्फ इतना कहना चाहता हूं, विरोधी चाहे कोई भी हो, अपना सर्वश्रेष्ठ

रही महिला टीम दोनों ने होटल पहुंचने के बाद केक काटकर जश्न मनाया। समारोह में उपस्थित लोगों में केंद्रीय कानून एवं न्याय मंत्री किरन रिजीजू, खेल राज्य मंत्री निसिथ प्रमाणिक, सचिव (खेल) रवि मित्तल और भारतीय खेल प्राधिकरण के महानिदेशक संदीप प्रधान भी शामिल थे।

सम्मान समारोह में खेल मंत्री ने नीरज को

स्मृति चिन्ह और शॉल भेंट की। कांस्य

विजेता पुरुष हॉकी टीम और चौथे स्थान पर

दो। आपको बस यही करने की जरूरत है और इस स्वर्ण पदक के यही मायने हैं। कभी विरोधी से मत डरो। चोपडा ओलंपिक में स्वर्ण पदक

चीजें हुई जो ओलंपिक में पहली बार हुई। ओलंपिक में 'टीम इंडिया' की सफलता इस बात को दर्शाती है कि कैसे नया भारत दुनिया पर हावी होने की इच्छा और आकांक्षा रखता है , यहां तक कि खेल में भी। - अनुराग टाकुर, खेल मंत्री

- मनप्रीत सिंह, हॉकी टीम के कप्तान

तोक्यो 2020 में भारत के लिए कई ऐसी

जीतने वाले 13 साल में पहले भारतीय खिलाड़ी के अलावा टैक एवं फील्ड में स्वर्ण जीतने वाले पहले भारतीय भी बने।

(2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौगंध खाई थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से घर से दूर

किग्रा भार वर्ग में कांस्य पदक जीता।

यह 23 वर्षीय खिलाड़ी ओलंपिक में

पदक जीतने वाली तीसरी भारतीय

मुक्केबाज है। उनसे पहले विजेंदर सिंह

बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने घूंसों को अतिरिक्त मजबूती प्रदान करना भी शामिल होगाँ क्योंकि तुर्की की ओलंपिक चैंपियन बुसेनाज सुरमेनेली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ रहा था।

बनाई है और इसके बाद पेरिस ओलंपिक

की तैयारियों में जुटना चाहती हैं जिनका

आयोजन तीन साल बाद होना है। उन्होंने

कहा कि तोक्यो ओलंपिक अब अतीत की

कोलिंस को सिलिकॉन वैली क्लासिक का खिताब

सैन जोस, 9 अगस्त (एपी)।

अमेरिका की डेनियल कोलिंस ने रविवार को रूस की चौथी वरीयता प्राप्त दारिया कास्ताकिना को हराकर सिलिकॉन वैली क्लासिक टेनिस टूर्नामेंट का खिताब जीता। सातवीं वरीयता प्राप्त कोलिंस ने अपनी अच्छी फॉर्म जारी रखते हुए कास्ताकिना को 6-3, 6-7 (10), 6-1 से हराया। उन्होंने 25 जुलाई को ही पालेरमो में भी खिताब जीता था। कोलिंस ने कहा, 'मैंने बहुत अच्छी शुरुआत की थी और मैंने अच्छी टेनिस खेली। मुझे नहीं लगता कि दारिया पहले सेट में अपना सर्वश्रेष्ठ टेनिस खेल रही थीं। दूसरे सेट में उसने वास्तव में अपने खेल में सुधार किया और 5-3 से आगे हो गई थी जिसके बाद मैं इसे टाईब्रेकर तक ले गई।' युगल में दारिया जुराक और आंद्रिया क्लेपाक ने गैब्रियला डाब्रोवस्की और लुइसा स्टेफनी से खिताब जीता।

नई दिल्ली, 9 अगस्त।

रवि दहिया – रजत पदक विजेता

तोक्यो अब अतीत, पेरिस से उम्मीद हर पहलू से नई शुरुआत करूंगी : लवलीना

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक पदार्पण पर पदक जीतना लवलीना बोरगोहेन के लिए सोने पे सुहागा जैसा रहा लेकिन इस भारतीय मुक्केबाज ने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। वह पेरिस में 2024 में होने वाले खेलों के लिए अपने खेल के हर पहलू में नए सिरे से शुरुआत करेंगी। लवलीना ने तोक्यो में महिलाओं के 69 किग्रा भार वर्ग में कांस्य पदक जीता।

इस उपलब्धि को लेकर उनका उत्साह और यह 23 वर्षीय खिलाडी ओलंपिक में पदक जीतने वाली तीसरी भारतीय मुक्केबाज है। उनसे लोकसभा में अध्यक्ष ओम बिरला ने तोक्यो पहले विजेंदर सिंह (2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी। लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौगंध खाई थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से घर से दुर रहना और मुश्किल परिस्थितियों में परिवार वालों का साथ नहीं दे पाना था। यह सबसे बडा बलिदान था। मैंने व्यक्तिगत तौर पर अपनी कुछ इच्छाओं को मारा जैसे वह भोजन नहीं कर पाना जैसा कि मेरी उम्र के लोग पसंद करते हैं। मैंने खेल पर ध्यान देने के लिए अवकाश नहीं लिया

और ऐसा लगातार आठ साल तक चला। उन्होंने अब छुट्टियां मनाने की योजना बनाई है और इसके बाद पैरिस ओलंपिक की तैयारियों में जुटना चाहती हैं जिनका आयोजन तीन साल बाद होना है। उन्होंने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने घूंसों को अतिरिक्त मजबूती प्रदान करना भी शामिल

बजरंग पूनिया – कांस्य पदक विजेता

होगा क्योंकि तुर्की की ओलंपिक चैंपियन बुसेनाज सुरमेनेली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ

तौर पर इसे होना चाहिए था। मैंने अपनी ताकत और अनुकूलन पर केवल पिछले चार महीनों में ही काम किया। मुझे इसका लाभ मिला लेकिन ओलंपिक जैसी प्रतियोगिता के लिए चार महीने पर्याप्त नहीं होते हैं। उससे कुछ नहीं होता आपको चार साल के चक्र में इस तरह का काम करना होता

उन्होंने पिछले कुछ सालों से साझा किया जाना रहा। इससे पता चलता है कि अपनी भावनाएं दबा रखी थीं जो मानवता जिंदा है और खेल एकमात्र जरिया है जो पदक पक्का होने के बाद खुलकर दो देशों, दो इंसानों को इस तरह से जोड़ सकता सामने आई। लवलीना ने कहा कि कई है। इटली के गियानमार्को ताम्बेरी और कतर के सालों तक मेरी भावनाएं अंदर ही मुताज बारशिम ने पुरुषों की ऊंची कूद में समान दबी रहीं। लेकिन इस ओलंपिक में जब हर बार रिंग पर उतरने पर मुझे देशवासियों INDIA अहसास हुआ तो तब मेरी भावनाएं

आ

बाहर निकलकर

लवलीना के लिए

ओलंपिक

गईं ।

में

पुरुष हॉकी टीम के खिलाड़ी - कास्य पदक

महिला हॉकी टीम के खिलाडी

सबसे यादगार पल क्वार्टर फाइनल में पूर्व विश्व

आखिर में उस मुक्केबाज को हराने में सफल

रही जिसने यहां आने से पहले मुझे चार बार

हराया था। उसे ओलंपिक में हराना मेरे करिअर

का विशेष क्षण था। दूसरा यादगार पल कतर

और इटली के बीच ऊँची कूद का स्वर्ण पदक

उन्होंने कहा कि सबसे यादगार पल मैं

चैंपियन नीन चिन चेन को हराना रहा।

ओलंपिक में भाला फेंक श्रेणी में नीरज चोपडा के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है। उन्होंने कुश्ती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदन की ओर से ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाडियों को बधाई दी।

राज्यसभा में सभापति एम वेंकैया नायडू ने कहा कि तोक्यो ओलंपिक में हमारी 120 वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

रहा था।

2.37 मीटर की ऊंचाई नापी थी। वह बारशिम थे जिन्होंने अपने अच्छे मित्र ताम्बेरी के साथ खिताब साझा करने की पेशकश की थी।

ऊंची कूद में दोनों खिलाड़ियों के सहमत के समर्थन का होने पर पदक साझा करने का प्रावधान है लेकिन पिछले 100 वर्षों से अधिक समय में ऐसा पहली बार हुआ। लवलीना ने कहा कि कोई कितना भी मतभेद पैदा करने की कोशिश करे, खेल सभी को साथ ला सकते हैं। मैंने उसको देखकर यह सीख ली।

Kamdhenu Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.
