Kamdhenu SS10000 gives unmatched robustness to buildings

BriefingWire.com, 8/27/2016

Provides double interlocking slip-proof grip with concrete which can withstand the seismic activities of more than 7 Richter scale intensity.

Delhi: The TMT re-bar is one of the core components of the construction materials and a crucial factor in ensuring strength and longevity of a building. It is actually the backbone of a construction. Thus, need of a TMT product suitable for the new age mega size infrastructures and constructions under high seismic zones is being felt in Indian construction sector. Addressing this felt need effectively, Kamdhenu Limited provides its latest product KAMDHENU SS 10000 TMT bar with more than twice stronger concrete bond and superior seismic resistance properties.

"An ultimate product for safer construction, KAMDHENU SS 10000 TMT Bars is the first and only product in its class featuring double ribs, double strength and double safety and aptly being hailed as a TMT bar with DO KA DUM meaning one TMT bar having the strength of two. It provides the strongest bond through its unique double-rib pattern and permits 254% more concrete grip in comparison to normal bars resulting much stronger construction" said Mr. Satish Agarwal, CMD of Kamdhenu Ltd.

This pioneering feat in TMT bar segment is realized using the latest UK based technology at par with international quality standards, as Kamdhenu has acquired technical know-how from UK to Design and manufacture KAMDHENU SS 10000 TMT bar. The product complies with the quality standards according to BIS specifications as well as British Standards B 500C. Knightsbridge Resources Limited, UK claimed "The carbon level as well as S&P level of the product is maintained at much lower level than the prescribed quality standard specifications and therefore the product features excellent ductility, high bend ability, better corrosion resistant, superior weldability and longevity."

Specifically developed keeping in view the stringent requirements of constructions under high seismic zones and other premium infrastructure projects like skyscrapers, flyovers, highways, KAMDHENU SS 10000 claims to permits best bonding of concrete and steel and create performance of concrete upto 10,000 Psi with right mixture of concrete. "For its bond strength and physical properties, the product is a notch above than any other product in its class and is indispensible for high-rise buildings and all kind of constructions in earthquake prone areas"- Mr Agarwal expressed.

The Company has also been operating through 'franchise business association model' for steel in order to promote its brand in association with various manufacturing plants spread across the country. The company is enjoying a huge marketing network of dealers and distributors to penetrate deep and wide market across the country. It promises to deliver high quality products and services to its customers at reasonable cost.

Thus, need of a TMT product suitable for the new age mega size infrastructures and constructions under high seismic zones is being felt in Indian construction sector. Addressing this felt need effectively, Kamdhenu Limited provides its latest product KAMDHENU SS 10000 TMT bar with more than twice stronger concrete bond and superior seismic resistance properties.

"An ultimate product for safer construction, KAMDHENU SS 10000 TMT Bars is the first and only product in its class featuring double ribs, double strength and double safety and aptly being hailed as a TMT bar with DO KA DUM meaning one TMT bar having the strength of two. It provides the strongest bond through its unique double-rib pattern and permits 254% more concrete grip in comparison to normal bars resulting much stronger construction" said Mr. Satish Agarwal, CMD of Kamdhenu Ltd.

This pioneering feat in TMT bar segment is realized using the latest UK based technology at par with international quality standards, as Kamdhenu has acquired technical know-how from UK to Design and manufacture KAMDHENU SS 10000 TMT bar. The product complies with the quality standards according to BIS specifications as well as British Standards B 500C. Knightsbridge Resources Limited, UK claimed "The carbon level as well as S&P level of the product is maintained at much lower level than the prescribed quality standard specifications and therefore the product features excellent ductility, high bend ability, better corrosion resistant, superior weldability and longevity."

Specifically developed keeping in view the stringent requirements of constructions under high seismic zones and other premium infrastructure projects like skyscrapers, flyovers, highways, KAMDHENU SS 10000 claims to permits best bonding of concrete and steel and create performance of concrete upto 10,000 Psi with right mixture of concrete. "For its bond strength and physical properties, the product is a notch above than any other product in its class and is indispensible for high-rise buildings and all kind of constructions in earthquake prone areas"- Mr Agarwal expressed.

The Company has also been operating through 'franchise business association model' for steel in order to promote its brand in association with various manufacturing plants spread across the country. The company is enjoying a huge marketing network of dealers and distributors to penetrate deep and wide market across the country. It promises to deliver high quality products and services to its customers at reasonable cost.

About Kamdhenu Limited:

Kamdhenu Limited is a leading company of Kamdhenu Group which manufactures, market, brand & distribute all products related to building construction such as steel, paints, plywood & etc. ISO 9000:2008 certified & listed in BSE & NSE, company has done the business value of Rs. 885 cr. in the FY 2015-16. But put together all the brand value of Kamdhenu's product is more than Rs. 8,000 cr. The company is having more than 60 franchisee manufacturing units and 4000 dealers of paint division and 4500 dealers & distributors of steel, spread across the country.
